

INFECTIOUS DISEASE PROCEDURE

02/07/13

Purpose

To manage health and safety risks around nappy and clothes changes for hygiene, first aid and the comfort of young children in Kindergarten, Occasional Care and Playgroup.

Objectives

1. Risk Management
2. Risk assessment and hazard identification
3. Risk control

Procedural Requirements

Director

- Consider the hazards of infectious disease
- Direct risk management processes
- Offer vaccinations to staff as indicated (with DECD funding)
- Provide Parent information about relevant health information and illness

Staff

Hygiene/cleaning

- Personal responsibility for own health, wellness and safety
- Maintain high standard of cleanliness and hygiene
- Consult with Director in regard to hazards and infection risk
- Practice standard precautions
- Use latex gloves and wash hands appropriately
- Disinfect floor, benches, surfaces, buckets etc thoroughly

Disposal/laundry

- Dispose of needle sharps (commonly found in the park) in needle stick container and inform Director
- Dispose of nappies in nappy disposal unit
- Dispose of blood, vomit etc in double bags and placed in outside bin
- Place soiled clothing in sealed bags, labeled and kept out of reach in bath for parents/carers to collect

Supervision

- Assist children to change themselves as much as possible
- Inform another staff member while in bathroom for nappy or child changing

Parents

- Informing staff about health concerns for child
- Notifying Kindergarten about illnesses and head lice
- Ill children remaining at home not at Kindergarten
- Emergency contact information remains current
- Collecting sick/injured child from Kindergarten as required by Teacher in charge.
